Versatile Vector Graphics
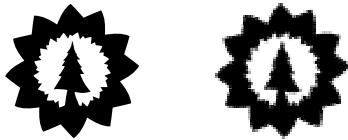

So you've drawn a logo design that you're really proud of—maybe you've even been using it for a couple years.

As you grow your business, logos made from scans of pen on paper become hard to work with.

As good as a pixel-based image may look from far off, if you try to make it any bigger, you'll start to see the individual squares.

A Logo You Can Use Anywhere

I'll turn your hand-drawn or bitmap logo design into a vector graphic you can use anywhere, while preserving the essence of your vision.

Vector graphics can scale to be as large as you need, so you can put them anywhere you want!

Since vectors are made from mathematical expressions, they'll never lose quality, no matter what you need.

Pricing

Logo vectorization work under 3 hours	$39.99
Each hour thereafter	$9.99
