Vector Logo Design

Versatile Vector Graphics

So you've drawn a logo design that you're really proud of—maybe you've even been using it for a few years.

As you grow your business, logos made from scans of pen on paper become hard to work with.

As good as a pixel-based image may look from far off, if you try to make it any bigger, you'll start to see the individual squares.

A Logo You Can Use Anywhere

I'll turn your hand-drawn or bitmap logo design into a vector graphic you can use anywhere, while preserving the essence of your vision.

Vector graphics can scale to be as large as you need, so you can put them anywhere you want!

Since vectors are made from mathematical expressions, they'll never lose quality, no matter what you need.

Bespoke Logo Design

On the other hand, if you need a logo but don't have one, I'd be happy to design the branding your business needs.

Pineflower

I'll create not just your basic logo, but also a wordmark and various combinations of the two. In the end, you'll receive your branding assets in colour, monochrome, and all the various file formats you'll ever need.

Pricing

Vectorization Work under 3 hours	$39.99
Each hour thereafter	$11.99
Design Services under 3 hours	$48.99
Each hour thereafter	$21.99
Unusual Design Requirements	Ask for a quote if your logo entails any unusual tasks.
